Minimum Recommended Airspaces

If you have a cupboard above the refrigerator with a rear gap of less than 100mm (Y), recommended minimum clearance at the top of the refrigerator increases from 30mm to 70mm (X).

Please note: Doors are designed to sit proud of cabinetry (not flush).

When positioned in a corner area, spacing of at least 400mm on the hinge side will allow the doors to open enough to enable the removal of bins and shelves.

Front face of bench aligned to front corner edge of cabinet.
