KEY FEATURES & BENEFITS

Convection, Grill & Combination Cooking

Different types of cooking are possible with the NN-CD87KSQPQ Microwave and you can now experience faster and greater results with Simultaneous Combination cooking such as Grill or Convection baking combined with Inverter Microwave cooking.

Easy One Push Reheating

Just put food in and press the Start button. The Genius sensor detects heating conditions and the Panasonic Inverter finely controls power for optimum heating at the press of a single button.

Family Size Cooking

With the fan at the top of the oven, the interior space has been increased providing you with a spacious 36cm turntable. This gives you more flexibility to use larger dishes and plates.

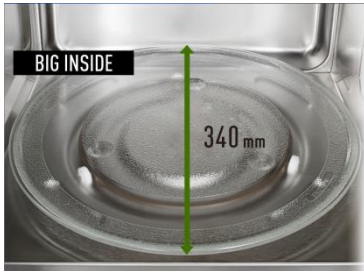

Healthy Eating from the Start

With 7 convenient pre-programmed auto menus for kids, the unique Junior Menu on the NN-CD58JSQPQ, ensures that even picky eaters enjoy healthy delights. Just enter the weight of the food and the oven does the rest. Pre-programmes for children include puréed fruits/veg, pasta bake, vegetable fries and more!

Slimline Design

The intelligent internal design of the NN-CD87KSQPQ reduces the overall footprint by approximately 15% compared to conventional combination ovens, leaving you with more space available on your kitchen bench.
