LIEBHERR

Telescopic shelf: The telescopic wire shelf makes it easy to access drinks located at the rear of the shelf, so all valuable space can be utilised efficiently.

Sectionable glass shelf: The middle glass shelf is sectioned so that the front half can slide under the other to provide room for taller beverages or food items.

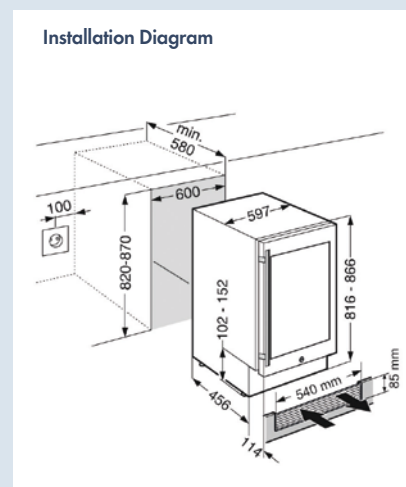

Integrated lock: Integrated in the door below the glass, this sturdy lock provides protection from unwanted entry.

Liebherr's **UKes 1752** built-in underbench beverage centre offers the perfect storage solution for food and beverages. With a temperature range starting at just 2°C, beverages will always be perfectly chilled and food freshly preserved.

Double tinted glass ensures that harmful UV rays are filtered, whilst allowing you to easily view the contents within. Storage space is abundant with 4 shelves (base, wire and 2 glass), plus 1 glass shelf is sectionable to allow for taller items.

UKes 1752 Built-in

Energy consumption (kWh/yr) Star rating	337 0.923
