Integrated

This refrigerator with bottom freezer and variable temperature drawer seamlessly integrates into your kitchen, fitting flush into your cabinetry.

Integrated

Dimensions

Depth	544mm
Height	1773mm
Width	555mm

Features & Benefits

Variable temperature drawer

The variable temperature drawer is designed to allow optimal storage of fresh meat, produce, deli and dairy products at their ideal temperatures. Operating separately from the fridge and freezer, the drawer operates from -5°C and 3°C, with 3°C ideal for fruit and vegetables, -1.1°C perfect for fresh meats, and -3°C for fast chilling - keeping your food fresher for longer.

Fast freezing

When freezing fresh food, the freshness, texture and taste are retained with rapid freezing. The fast freeze function boosts the freezing speed by dropping the freezer to its coldest temperature (-24°C) for 12 hours ensuring food is fast and fully frozen. Plus, you never need to worry about defrosting your fridge with the built-in frost-free function.

Simple storage

This fridge is designed to make it simple for you to store, access and remove food. Storage bins give you full access inside when they're pulled open and can be easily removed to clean. Adjustable shelving in the main cavity and door provide flexible storage options.

Easy installation

Our integrated products are easy to install, whether you are renovating your kitchen or designing a new one. They are designed for minimal gaps with adjustable door panels that can be customized to match your kitchen.

Beautiful lighting

Bright LEDs light up the ceiling, shelves, bins and tray in both fridge and freezer, making it easy to find your food and creating a welcoming glow in your kitchen for those midnight snacks.

Easy cleaning

Spill-safe secure glass shelves easily capture any drips or leaks and prevent them from falling on items below.

Specifications

Capacity

Freezer	80 L
