32" PROGRILL

Built-In Open Grill BBQ with Solid Flat Plate

PRO32RBI

CAPITAL
EXTRAORDINARY COOKING™

Features & Benefits

Warranty	2 Year Manufacturer Warranty
Stylish Design	Handcrafted design made with high-quality stainless steel
Precision Burners	Stainless steel burners with flame failure to reduce flare ups and assist with even heat distribution
Stainless Steel Grill Rods & Solid Plate	Perfect for flame grilling, the grill rods are made from high-quality stainless steel, along with a solid teppanyaki plate
Motorised Rotisserie with Rear Burner	Infrared style cooking provides quick searing heat and radiant temperatures, perfect for your roasts. Rotisserie plugs into a standard 10AMP power supply
Electronic Ignition	Reliable ignition without the need to use of flammable or explosive lighters
Integrated Thermostat	Integrated into the BBQ hood, the thermostat allows for accurate temperature reading while cooking
Gas Type	The ProGrill is available in both LPG with a 9kg gas bottle and Natural Gas options. For Commercial installation, the natural gas option is required
Indoor/Outdoor Installation	Certified to be installed in enclosed areas; including a roof and 3 walls, with 25% natural air ventilation

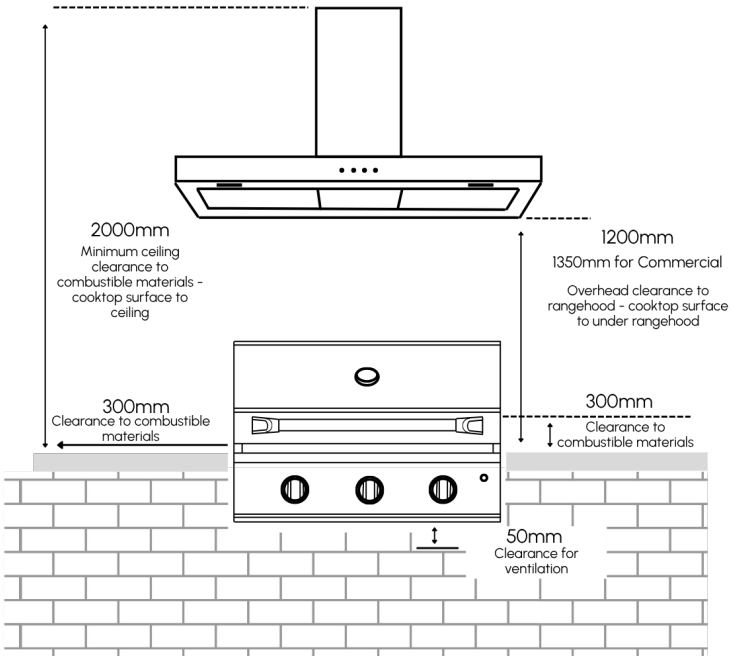
Minimum Clearances



WARNING: Technical specifications and product sizes can be varied by the manufacturer without notice. Cut outs for appliances should only be physical product measurements. The above information is indicative only. Do not cut your cabinetry or bench tops until you have physically received your Capital BBQ to ensure optimum results.
Minimum clearances to combustible materials must be maintained.
For Natural Gas Conversion please refer to the product user manual. This processed should only be done by an authorised professional.

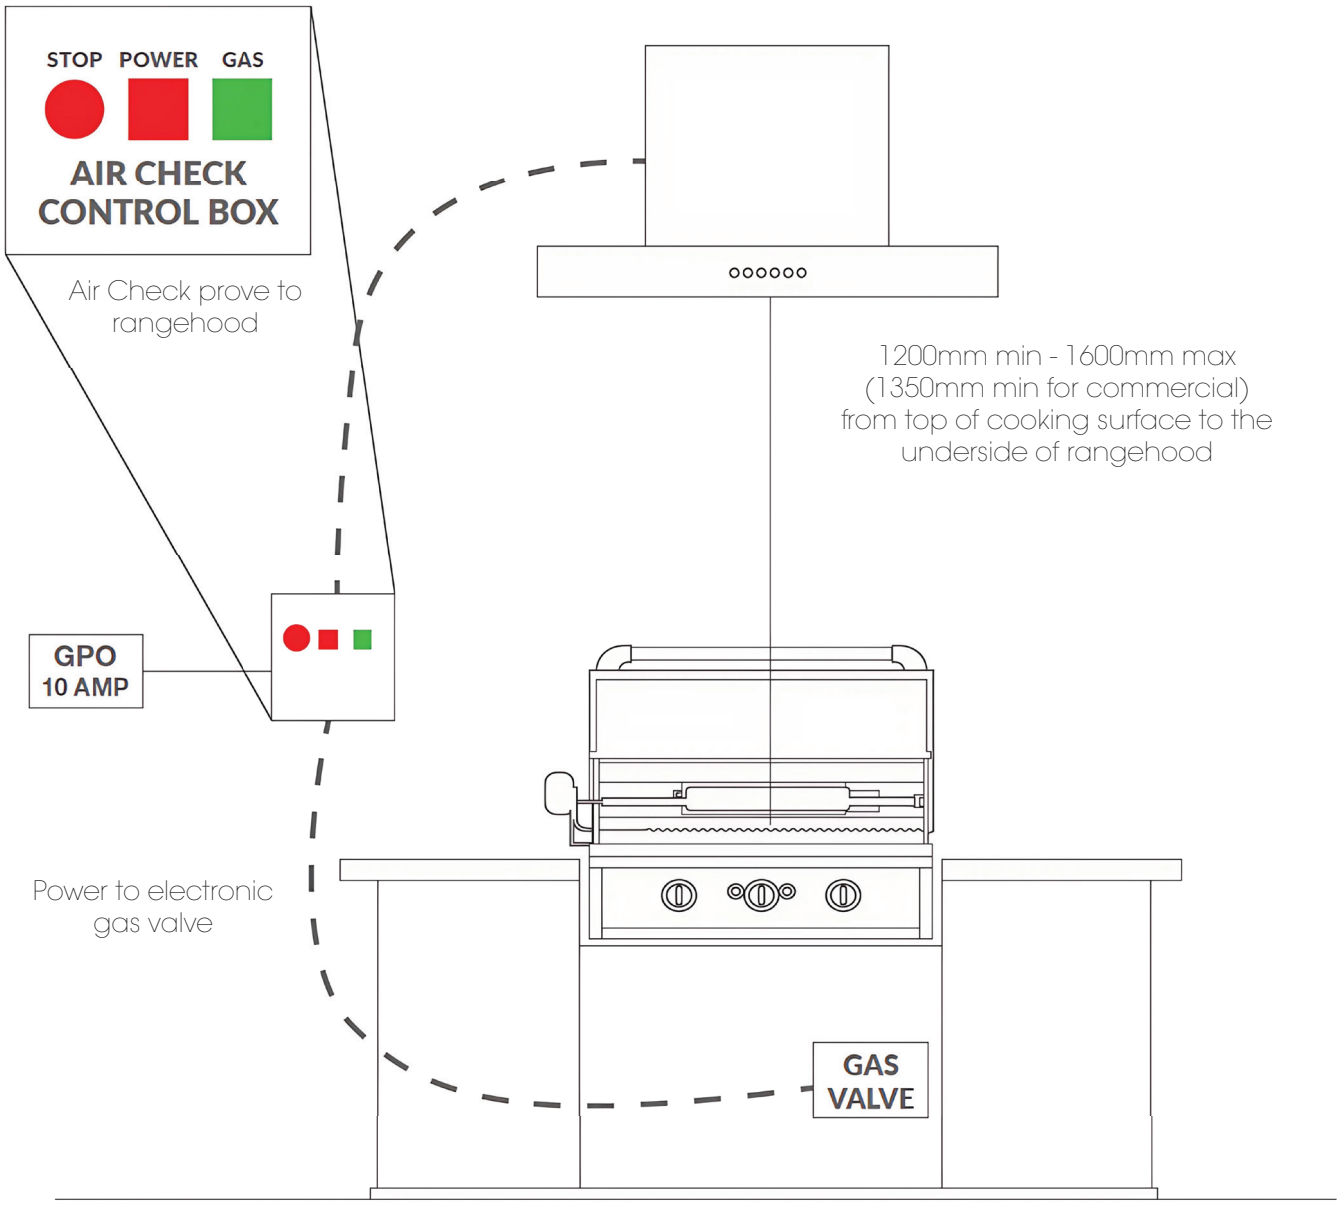
Air Check



Capital's Air Check is a self-contained device designed for Commercial and indoor BBQ installations, where there is a requirement for the appliance to have an interlock installed. The Interlock system is designed to only allow the Gas Valve to open once, the extraction fan is operating. Once the rangehood is operating, gas will flow to the appliance and the BBQ can be ignited. Ref: AS/NZS 5601.1:2013 Clause 6.10.1.15.

Capital's Air Check works to prove that there is air flow in the Extraction System. Once the Rangehood is powered on and extraction commences, the controller detects the air movement via the fitted prove. Once air movement (Extraction) is proven, the controller will send a signal to the electronic gas valve to open. At this stage the PROGRILL BBQ can be ignited.

Capital's Aircheck ensures that you BBQ safely. Capital's Aircheck will automatically lock the gas valve and prevent gas flow if the rangehood stops working or is working with reduced or unacceptable extraction levels. The system is also fitted with a key / twist release emergency stop button on the front panel which, will also cut the gas supply if pressed.
