Instant Filtered Water Tap Collection

Let us help you Kitchen Better.

InSinkErator's instant filtered water tap collection brings style, convenience and efficiency to simplify your life in the kitchen.

Featuring a range of both all-in-one taps and side taps, you will be sure to find the ideal solution for your kitchen.

Designed and manufactured in Italy, the Multitap range offers a premium contemporary style to new and existing kitchen spaces. The Multitap brings with it elegance and practicality as the high-quality taps offer a variety of options across the range including instant filtered boiling, ambient and chilled water as well as regular hot and cold water, all available from a single multi-functional tap.

As an alternative option, the Hottap boiling water range of side taps are designed to sit alongside your standard kitchen mixer dispensing steaming hot and ambient filtered water.

multitap hottap

Pasta, noodles, blanching vegetables

CLEANING
Instant boiling water makes cleaning easier and faster

NeoTank™

DELIVERS INSTANT FILTERED BOILING WATER

The space saving compact underbench unit design filters and delivers instantaneous boiling water to 98°C . Installation is easy and designed for domestic kitchens.

- Space saving design can be affixed to internal cabinet wall
- 2.5 litre stainless steel tank capacity
- Touch-panel control display with adjustable temperature (98°C)
- Quiet, energy-efficient operation
- No cupboard ventilation required
- Easy installation with tool-free connections and dry-start protection
- Includes filter
- Reduces chlorine, lead, and other unpleasant tastes, chemicals and odours from the water
- Special scale reduction technology protects heating elements

NeoChiller™

DELIVERS INSTANT FILTERED CHILLED WATER

NeoChiller® is a compact chiller unit that fits neatly beneath your benchtop. The InSinkErator filter system removes impurities including chlorine, lead, and other unpleasant tastes, chemicals and odours from the mains water supply to ensure a fresh, pure taste. The chiller unit then chills the water to the perfect drinking temperature, straight from the tap.

- Compact underbench unit designed for easy installation under the kitchen sink
- Dispenses up to 7 litres per hour of chilled water between 3°C and 10°C
- Filters remove impurities and odours, without affecting the waters natural mineral content
- Ice-bank cooling technology for optimum chilling performance
