winner

**THERMOSEAL**

The seal of Smeg's quality, technical excellence and taste: succulent roasts, crisp pastry and impressive baking is achieved in Smeg's unique, perfectly controlled cooking environment. Thermoseal maintains the perfect atmospheric balance in the cavity for optimum cooking conditions.

**OPTIMAL ENERGY EFFICIENCY**

This new cavity is characterised by its unique shape, with rounded corners and smooth, uniform walls, for maximum thermal insulation and optimal energy performance. Unique in its class, the large oven is categorised in energy efficiency class A+ (EU standard).

**126L CAPACITY**

When entertaining, the massive capacity of Smeg's 90cm Freestanding Cookers makes catering simple. The generous 126 litres mean two roasts can be cooked side-by-side, with a huge tray of vegetables at the same time! Healthy meals are ready in just 30 minutes.

**RAPID PREHEAT**

With rounded corners and smooth, uniform walls, the new cavity ensures maximum thermal insulation and helps to reduce pre-heating time. The Portofino takes just six minutes to reach a temperature of 200 °C - a time saving of 50% compared to a standard oven.

**SOFT CLOSE DOOR**

The new soft-close mechanism on Smeg's oven doors ensures a two-stage soft and quiet close. Smeg's quality hinges also ensure the door will not drop on opening, an intrinsic safety feature.
