Fan convection system

Fast heat up

Soft-close doors
Soft Closing hinges ensure smooth and virtually silent door closure with just a gentle touch.

160 automatic programs

OptiFlex™ telescopic runners

BENEFITS

STEAM. NEXT LEVEL COOKING.

Take your dishes to a new level with SteamCrisp. How? Traditional oven heat is enhanced by the introduction of steam, combining precisely to give your cooking the best of both culinary worlds. Your meat, poultry and vegetables are crisp and golden on the outside, whilst juicy and consistently cooked throughout.

CLEAN YOUR OVEN WITH EASE

The self-cleaning pyrolytic function takes all the effort out of keeping your oven clean. The oven is heated to a temperature that makes the grease and food residue turn to ash, which can then simply be wiped away with a damp cloth.

SENSECOOK. JUST SENSATIONAL.

Rare. Medium. Well done. At your command with SenseCook. Select how you would like your food cooked, insert the Food Sensor, and your oven will do the rest. Without even opening the oven door, everything from tender joints of meat to molten chocolate fondants are controlled and mastered. At last, an oven that speaks your language.

CONTROL AND PRECISION

The responsive touch-screen TFT display gives intuitive access to the different functions of the oven and provides you with direct feedback, ensuring you have full control at your fingertips.

YOUR BUILT-IN COOKING GUIDE

160 specially designed pre-set recipe programs mean you can select the dish you want to cook and let the oven do the rest.
