PRODUCT HIGHLIGHTS

58MM PORTAFILTER

Like your local barista, use a professional 58mm stainless steel portafilter to create a full-flavoured coffee. Single and dual wall filters can be interchanged for the best experience.

TRIPLE THERMOBLOCK SYSTEM

With three thermoblocks the EMC02 is ready to brew your favourite espresso in just four minutes from the moment you turn it on. This system also ensures a perfect extraction every time as there is no temperature loss throughout the brewing process, resulting in maximum flavour extraction and aroma preservation.

15 BAR PUMP

Choose from 5 low pressure pre-infusion profiles and extract the perfect espresso at 9 Bar. All via a 15 bar pump. All of this combined, and you can create a full-flavoured aromatic espresso.

VERSATILE BREWING OPTIONS

Choose from the pre-set functions for a single and double espresso, or take full control and use the lever to extract your espresso manually.

PRECISE CONTROL

Equipped with a pressure gauge and built in shot timer, the EMC02 allows for precise extraction control during brewing.

NOTE:All plastic material that comes into contact with food or water is BPA free
